DETAILED ACTION

The following is a response to the amendment received on July 31, 2009 which has been entered.

Response to Amendment

Claims 26-50 are pending in the application.

-The objection to claims 26 and 28 are withdrawn due to applicant amending these claims to correct clarification of limitations.

-The 102(b) and 102(e) rejections of claims 26, 28-33 and 35 has been withdrawn due to applicant amending claim 26 over the prior art of record used in the rejection.

Allowable Subject Matter

Claims 26-50 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or render obvious a motivation to provide for:

-(as to claim 26) a dual clutch planetary transmission having four planetary gear sets, first and second frictional shifting elements, seven shape fit shifting elements for gear ratio selection, the first set is a simple planetary, the second, third and fourth set forms a 3 carrier, 5 shaft transmission with separate planetary gears, the first and second elements is positioned between a transmission input shaft and the first set, the seven shape fit elements are arranged between the first and second sets and in combination with all the limitations as written in claim 26.

Art Unit: 3655

-(as to claim 27) a dual clutch planetary transmission having four planetary gear sets, first and second frictional shifting elements, seven shape fit shifting elements for attaining ratio stages wherein the second, third and fourth set form a reduced 3 carrier, 5 shaft apparatus in which the second and third planetary gears are bound together by dual planetary gears without stepping and in combination with all the limitations as written in claim 27.

-(as to claim 34) a dual clutch planetary transmission having four planetary gear sets, first and second frictional shifting elements, seven shape fit shifting elements for attaining ratio stages, the second, third and fourth set forming a 3 carrier, 5 shaft apparatus with separate planetary gears, the first set being a simple planetary set and a first shaft of the first set is bound to a transmission input shaft and an additional shaft of the first set can be stopped by the second frictional shifting element acting against a housing component and in combination with all the limitations as written in claim 34.

-(as to claim 36) a dual clutch planetary transmission having four planetary gear sets, first and second frictional shifting elements, seven shape fit shifting elements for attaining ratio stages, the second, third and fourth set forming a 3 carrier, 5 shaft apparatus with separate planetary gears wherein a carrier and internal gear of the second set is connected with a carrier and internal gear of the third set and in combination with all the limitations as written in claim 36.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
